

INTERMOLD KOREA 2025

THE 27th KOREA INT'L DIE-MOLD & RELATED INDUSTRY EXHIBITION

2025. 3. 11 ▶ 14 KINTEX

Dear Sir,

The biennial Die & Mold exhibition, INTERMOLD KOREA, will be held in KINTEX for 4 days from March 11 (Tue) to 14 (Fri), 2025.

The 27th INTERMOLD KOREA 2025 is the only specialized Die & Mold exhibition in Korea and one of the most recognized Die & Mold exhibitions in Asia. Since 2013, INTERMOLD KOREA has been expanding its scale by simultaneously holding the Korea International Plastics & Rubber Show(Koplas), which is a leading manufacturing industry exhibition Korea.

As the only specialized Die & Mold exhibition, INTERMOLD KOREA has been serving as a platform for furthering the development of the domestic Die & Mold industry as well as a stage for marketing of participating companies from home and abroad. In today's rapidly changing technological landscape, the Die & Mold industry is transitioning via AI, robotic and automated system convergence and integration.

Against such backdrop, the Korea Die & Mold Industry Cooperative(KODMIC) is seeking to hold INTERMOLD KOREA 2025 by broadening the scope of exhibited items with the aim to maximize synergy with such industries related to the Die & Mold industry as 3D printing, forging & casting, welding, heat treatment, and robotics.

Korea offers a marketplace where 4,000 Die & Mold companies compete and annual market size is valued at USD 10 billion, and will certainly serve as a golden platform for participating companies to expand business opportunities in Korea and Asia. As such, KODMIC encourages companies to participate in INTERMOLD KOREA 2025 to showcase their products to promote marketing activities.

Your kind consideration will be highly appreciated, I remain.

Best regards,

President **Shin, Yong Mun**
Korea Die & Mold Industry Cooperative
